

Smart and connected products have a huge potential in the electrical market. But what's the view of the electrical installer? Do they install smart products and if so, what kind of products? Will this increase in the upcoming years? These, and many more questions are answered in the latest Q3 2019 report of the European electrical installation monitor. This report provides need to have information on the development of smart buildings and products from the perspective of the European electrical installer.

**Share of smart home activities in the daily assignments**

**Key research questions:**

- What is the opinion of electrical installers on smart products and how often do they install these products (and which ones)?
- What is the demand for smart products?
- Which manufacturers are the leaders with regards to smart products?
- Reasons for and against installing smart products.
- Issues encountered when installing smart products.
- Various statements on smart products.
- Turnover and orderbook developments of electrical installers.

**Countries covered in the report:**

France, Belgium, the Netherlands, Germany, Poland, Spain and the UK.

**Methodology:**

The report is based on 950 successful telephone interviews with electrical installers in 7 countries. The report counts 53 pages excluding the appendix.

**Interested?**

The full report is available now for 1,750 Euro or free in combination with a 1 year subscription (4 quarterly reports) for 6,000 Euro.
