

Why this report?

The trend towards prefab and modular buildings is developing rapidly and prefab is being applied all around us. How fast is prefab developing? Which countries are ahead? Which building components are most commonly prefabricated? What support do architects require? These questions and many more are answered in the Q3 2016 report, the future of prefab. A must have report for understanding the development of prefab in the construction industry.

Research characteristics

- Construction volumes forecast until 2019
- Special theme: Sustainability
- Fieldwork conducted in Q3 2016
- About 100 pages in PDF and hardcopy

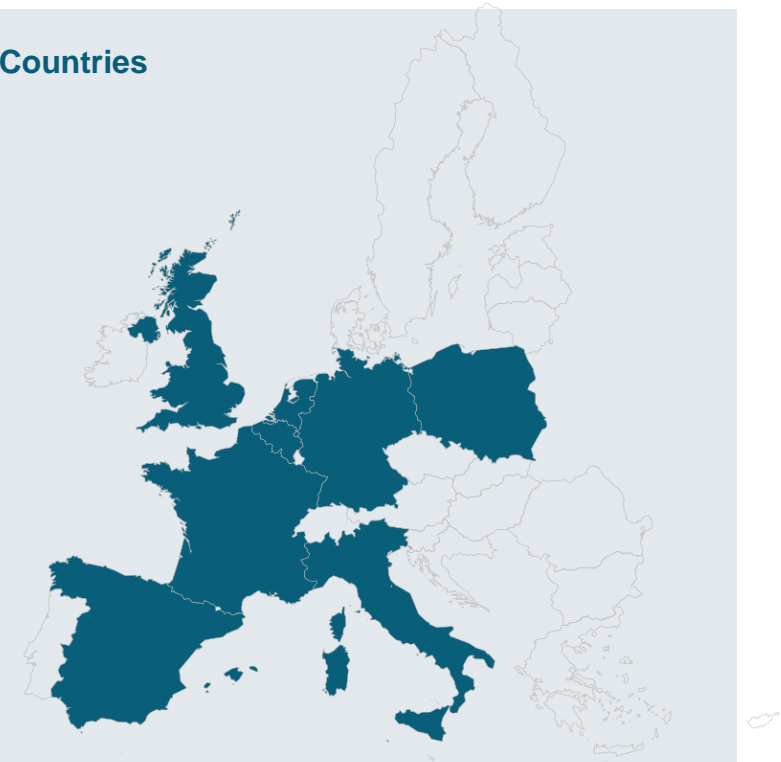

Methodology

-  Quantitative phone research:
200 successful interviews per country
1600 successful interviews with architects in total

Target group

-  Architects (2fte and more) active in the residential and the non-residential market

Countries

Costs

Total report: **€ 1,750**

There is also a possibility to subscribe:

- The price for subscribing to this monitor is 6,000 euro.

Examples of the research questions

- To what extent do principals ask for prefab building elements and are they willing to invest more in the use of prefab elements?
- In what type of projects are prefab elements mostly applied?
- How did prefab construction develop in the last years and what do architects expect for the coming years?
